

Point Of Sale System

The *Xpert* point of sale system comes with the following features.

- User Level Security
- Multiple Users
- User Definable UOM
- Store Stock Management
- Multiple Stores Management
- Multiple modes of payment collection
- Stock Tracking
- Customer tracking
- Reorder Quantity and Level Maintenance
- Sales reports as per user requirements
- Sales by Counter Staff, Product and Customer
- Sales can be made in any unit and each unit with it's own price

The POS SB is stand alone with multiple users and Enterprise which is networked multi-user system. The multi-user system requires a central server based database (Microsoft SQL server) and a network.
